

Dear Editor,

As healthcare workers, we stand in solidarity with the Palestinian people as they are confronted by the destruction of their homes and evaporation of their hopes. In the face of the international community's silence, we condemn Israel's deliberate dehumanisation and dispossession of the Palestinian people.

Our colleagues have been killed and high precision weaponry has been used to target healthcare facilities. Dr Ayman Abu Al-Auf head of internal medicine and Dr Moein Ahmad Abu-Al Aloul head of neurology at Gaza's main hospital, Al-Shifa have been killed in the same bombing raid. Al-Shifa is the only facility capable of high level emergency care in Gaza, and had each of its access roads bombed so no ambulance can reach it. At least six other hospitals have been targeted.

None of this is new, Gaza has been strangled by an Israeli blockade since 2006. The third most densely populated area on earth, home to over 2 million people, has already suffered devastating assaults in 2014 and 2018. In the words of the UN Secretary General, "the closure of Gaza suffocates its people, stifles its economy and impedes reconstruction efforts. It is collective punishment." Faced with the current round of violence, there is nowhere for Gazans to flee to.

Occupation not only dehumanises the victim, it also brutalises the occupier. We see this in the trauma of the young recruits to the Israeli army, who have been damaged by a policy of enforced racism which in turn is eating away at Israeli society.

We urge our colleagues not to self-censor on these issues but to speak out. We cannot rely on the international community to effect a change. We must stand together and advocate for it.

To the people of Palestine, we say: we see you. You are not forgotten. You are not erased.

**Signed by over 1500 healthcare workers in 24 hours.**
